Re: Docket No. CP27-13-000 | Eastern Gas Transmission & Storage, Inc. | Project Stratum

Dear Secretary Reese:

On behalf of the Clinton County Board of Commissioners, we write in support of Eastern Gas Transmission & Storage, Inc.'s (EGTS) application for a Certificate of Public Convenience and Necessity for Project Stratum.

Reliable energy infrastructure is important to Clinton County's ability to retain existing employers, attract new businesses, and support industrial and commercial development. The proposed natural gas delivery point in Clinton County could help meet future energy needs and expand the options available to businesses evaluating sites or planning expansions here.

Project Stratum would build on EGTS's existing system through pipeline additions and station upgrades. The proposed work includes a pipeline segment from Leidy Station to Pine Mountain in Clinton and Potter counties. Across the project, EGTS proposes to add 250,000 dekatherms per day of firm transportation capacity. We see value in expanding the capacity of an existing system while adding a delivery point in Clinton County that can support long-term economic development.

We appreciate the opportunity EGTS provided for Clinton and Potter County residents to learn about the project and ask questions at its Cross Fork open house. We encourage EGTS to continue working with affected landowners, municipalities, and local emergency responders as the project advances.

The Clinton County Board of Commissioners respectfully requests that the Commission approve the application and issue a Certificate of Public Convenience and Necessity for Project Stratum. Thank you for considering Clinton County's support.

Sincerely,

Clinton County Board of Commissioners

James A. Russo, Chairman | Jeffrey A. Snyder, Vice-Chairman | Angela Harding, Commissioner
