Re: Docket No. CP27-13-000 | Eastern Gas Transmission & Storage, Inc. | Project Stratum

Dear Secretary Reese,

On behalf of the Clinton County Economic Partnership (CCEP), I am writing in support of Eastern Gas Transmission & Storage, Inc.'s application for a Certificate of Public Convenience and Necessity for Project Stratum.

Reliable energy infrastructure is an important consideration for employers deciding where to locate or expand. The proposed natural gas delivery point in Clinton County could give existing businesses more options as they plan for future energy needs and strengthen the county's ability to compete for new industrial and commercial investment.

Project Stratum would expand the existing transmission system through pipeline additions and station upgrades, including a proposed segment from Leidy Station to Pine Mountain in Clinton and Potter counties. The project would add 250,000 dekatherms per day of firm transportation capacity across the system. For Clinton County, the proposed local delivery point is especially significant because it could broaden the range of sites we can present to businesses with natural gas needs.

CCEP appreciates the opportunity Eastern Gas Transmission & Storage provided for residents to learn about the project and ask questions at its Cross Fork open house. We encourage continued communication with affected landowners, municipalities, and local emergency responders as the project moves forward.

The Clinton County Economic Partnership respectfully requests that the Commission approve the application and issue a Certificate of Public Convenience and Necessity for Project Stratum. Thank you for considering our support.

Sincerely,

Louis Anastos
President and CEO
