Re: Docket No. CP27-13-000 — Eastern Gas Transmission and Storage, Inc., Project Stratum

Dear Secretary Reese:

On behalf of the Potter County Board of Commissioners, we write in support of Eastern Gas Transmission and Storage, Inc.'s (EGTS) application for Project Stratum. This investment in Pennsylvania's natural gas infrastructure would expand transportation capacity, support reliable energy delivery, and strengthen opportunities for economic development throughout our region.

Project Stratum would add 250,000 dekatherms per day of firm transportation capacity through pipeline additions and upgrades to EGTS's existing system. With receipt points in Tioga County and Seneca serving as the project's shipper, the project would help connect Pennsylvania's natural gas production with customers and growing energy needs. Proposed improvements include pipeline looping in Beaver, Clinton, and Potter counties, upgrades to the Sabinsville Station in Tioga County, and new delivery points in Lawrence and Clinton counties.

For Potter County, the proposed pipeline installation between Leidy Station and Pine Mountain and crossover piping at Greenlick Station represent investments in the infrastructure supporting our regional economy. Construction activity could create opportunities for local workers, contractors, and businesses supplying goods and services. Over the longer term,

expanded transportation capacity would help support the energy infrastructure that businesses depend upon when maintaining operations and considering future investments.

As county officials, we recognize the importance of advancing infrastructure projects with careful attention to public safety, natural resources, landowners, and surrounding communities. We encourage EGTS to maintain open communication with local officials and affected property owners throughout the review, construction, and operation of the project.

The Potter County Board of Commissioners respectfully urges the Commission to complete its review in a timely manner and approve the requested certificate of public convenience and necessity for Project Stratum. Thank you for considering our support for this investment in Pennsylvania's energy infrastructure and economic future.

Sincerely,

Nancy J. Grupp, Chair

Paul W. Heimel, Commissioner

Robert W. Rossman, Commissioner
